Nesting Trolleys

Nest-Star AV Teaching Aid on Wheels

A complete large format audio visual teaching assistant on wheels that can be deployed quickly and neatly stowed when not in use.

This robust modular trolley is designed for large format displays and securely houses your favourite PCs and controllers, with built in stowage for keyboard and mouse. Because we understand that the particular type of AV equipment is important to you we will customise the trolley mast with cut-outs for your choice of controllers.

Two models are available. The standard version is for displays up to 70" and the heavy duty version will support up to 84" displays.

These trolleys can quickly turn a space into an e-learning environment that is populated by students when required. Whilst Sinterflex Black is the standard colour, other bright bold finishes are available as shown.

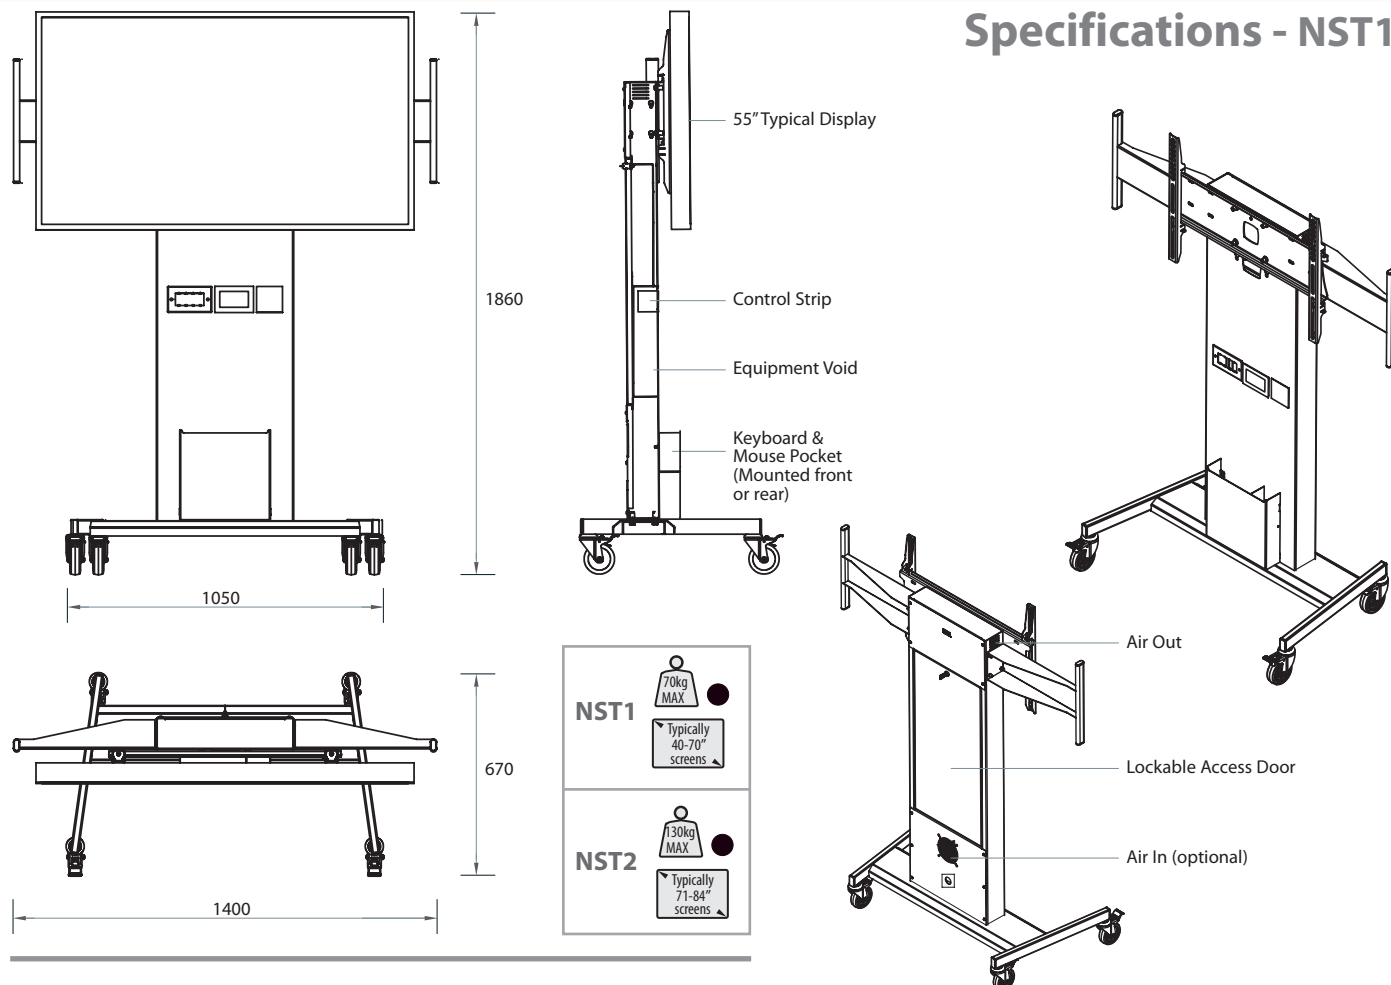

- * Robust modular construction
- * Easy to assemble and install
- * Colour finishes available
