

UNICOL®

RHOBUS® PowaLift

Electronic control & PowaLift technology combine in this versatile heavy duty unit.

Based on our successful and elegant Rhobus range this heavy duty trolley, operated by wireless remote or manual switch, can command screens to rise or descend smoothly through 700mm, stopping safely at any point.

These units serve many requirements, particularly in the field of Special Needs, enabling young children or wheel chair users to interact with touch screens. 'Touch of a button' height control also makes it easy to move from one location to another through doorways.

Supplied with screen mount, hand held remote and manual switch as standard.

- * Safe, smooth operation
- * Well proven technology
